THE ROYAL PARTY.

SPEND SUNDAY IN OTTAWA.

To Visit Winnipeg Thursday.

Will Accompany the Party West.

Winnipeg, Sept. 23.

The royal party will remain in Winnipeg Thursday evening. Sunday at Ottawa was spent at Christ's church service in the morning and at Rideau Hall in the afternoon. On Saturday the memorial was unveiled and services were held on several Canadian ships. The party will accompany the royal party on their western tour.

THE WAR.

HEARD FIGHTING IN CAPE COLONY.

Times Criticizes War Operations.

Wittgen attacked Lovell's accounts of the battle of Cape Colony, and both were lost heavily. The London Times severely criticizes the government's management of the South African war.

General Telegraphic.

THE CABINET TO THE SUPREME COURT.

From the Commons to the Bench.

Thanksgiving, November 28.

Wheat Lower in Chicago.

Higher at Liverpool.

Heavy Wheat Shipments.

Business Defeats the Abbott for \$30,000.

Not a Poisoned Bullet.

Big Failure in St. John.

Mr. Louis Davies, minister of marine fisheries, has been raised to the cabinet position on the supreme court bench, and Mr. Britton, M. P., for Ontario, to the Ontario high court. Thanksgiving day in Canada will be observed 23rd.

Chicago wheat market was dull on Saturday, but Liverpool was higher. On Friday 275,000 bushels of wheat were delivered at C. P. R. points in Manitoba.

The great stallion Cereus, defeated the Abbot in Redville, Mass., for \$20,000 prize.

Merrell Bros. failure in St. John, N. B., is one of the largest, on record, in that province.

The section protest in Stormont and Cornwall and in South Ontario was dismissed.

Senator Ross was given a warm welcome at Niagara-on-the-lake by Ontario liberals, on his return from England.

Prince Chun, who apologized for the Von Kettler's murder, has been the recipient of many kindnesses in Berlin.

The bullet in the assassin Czolgosz's hand was tested and found to contain no poison. His trial starts to-morrow.

Edmonton Presbyterian church celebrated the fiftieth anniversary of its organization by Dr. Black.

The New Westminster team has been crowned champion of the British Columbia.

President Loubet's recent reference to a military luncheon has agitated French.

Alex. Principal Grant, of Quebec's university, Kingston, Ont., is critically ill.

John Sullivan won the free-for-all sailing race in Winnipeg on Saturday.

Frank B. Canton, assistant secretary of the Y. M. C. A., Winnipeg, is dead.

The Dominion letter carriers association meets in Winnipeg next year.

General Dighton went through a serious operation in Manila.

South of Toronto, had his skull broken in Yorkton, Ass.

A rebellion has broken out in the southern part of Brazil.

Insp. Croftswaithe went to Calgary today to take part in the royal reception there.

Misses K. W. MacKenzie, J. A. Russell, Wm. Short and G. J. King returned Saturday night from their day trip to Beaver lake. They left on Monday last, their destination being Mr. Logan's ranch at the lake. The trip was a thoroughly enjoyable one. Both chicken and ducks were abundant and shooting was excellent. About seventy-five per cent of the crop of eggs was in stock and one-third of the total yield was in stock. The trip each way occupied two days.

LOCAL.

—W. S. Robertson went to Cooking Lake Friday.

—Rev. D. G. McQueen visited Calgary last Friday.

—A special train with a number of immigrants arrived last night.

—An agency of the Mutual Life Insurance Co. has been opened in the Gariepy block by Russell Bankerman.

—Frank H. James, of Thornhill, Ont., arrived on Wednesday of last week, and is the guest of E. Richardson, of Thornhill, Farm, East Edmonton.

—Anson Dulmage, lately of Edmonton, returns Thursday from a visit to his home at Saskatoon to resume his situation in Macdonald's pharmacy.

—Corp. Phillips, N. W. M. P., came in from the Landing Thursday night to meet Mrs. Phillips, who returned the same evening from a visit to the States.

—The ordinances passed at the last session of the Northwest assembly are to be held in the public school here on Monday and Tuesday, the 14th and 15th Oct., at which all parents are requested to attend.

—Meetings of the teachers' association will be held in the public school here on Monday and Tuesday, the 14th and 15th Oct., at which all parents are requested to attend.

—Alberton, Calgary: Mr. J. Brodt, immigration agent of Regina, left for the north on Thursday morning with 18 delegates from Texas, Kansas, Minnesota and Nebraska.

—Miss McNamara, daughter of Mrs. McNamara, of Edmonton, returns to Calgary this week from Liverpool, England, where she has been for the past five years a novice in the convent there.

—Regina - London: The weather played the deuce with the Ban-América circus that visited the capital last week. At a loss, however, they gave an afternoon performance which was highly appreciated.

—A strange growth of potatoes has been shown the Bulletin by Jas. McDonald. New potatoes have formed inside instead of outside of the old ones. Their growth burst the old potatoes and now they appear partly inside and partly outside the seed potatoes.

—Regina Leader: Regina liberal association has passed a resolution asking the government to follow the precedent created by the election of Mr. Scott to a judgeship, and fill the vacancy occasioned by the death of Judge Hovell, by selecting a member of the Territorial bar.

—Regina Leader: A curious description is reported from the N. W. M. P. Const. Jardine took a lunatic to Brandon, and after delivering him, sent back to Moose Jaw his uniform and money belonging to the government and then skipped. Jardine was a great boxer and very popular at the barracks.

—W. Picard, of the Alberta Hotel, was opening a bottle of soda water Saturday when the bottle burst with terrific force. A piece of the broken glass struck Mr. Picard over the eye and inflicted a large and painful gash. Dr. Braithwaite was sent for and discovered that the eye ball was not injured. It is not expected that any serious injury will result.

—On Thursday evening, September 20th, a wild duck banquet will be held in the Salvation army hall in connection with their annual harvest thanksgiving festival. A cordial invitation is extended to all, and a pleasant time is anticipated. Admission 25c. On the preceding evening a sale of fancy work and vegetables will take place at the barracks.

—Another shooting accident occurred Friday evening about twenty miles northwest of town, towards the Horsegown, by which Chas. Boltz, whose home is in Grey Co., Ontario, will lose the greater part of his right hand. Boltz was with Alex. Innes, of Johnston & Innes, of the Elipsoe brewery, of Edmonton, started out Friday for a three days shooting and camping trip. About six in the evening, just as they were about to go into camp, some ducks were seen on a nearby slough and Boltz jumped from the rig to try a shot. Being unsuccessful he returned to the rig and was replacing his gun among the baggage back of the seat when the charge exploded. The entire charge passed through the right hand, lacerating terribly the muscles and small bones and tearing out the knuckle joints. How it happened Boltz does not know. Though suffering greatly he bore up pluckily and re-entering the rig was driven rapidly to a farm house nearby where the wrist was tied tightly after which the team was turned towards town. About seven miles out, becoming weak from loss of blood and unable longer to bear the pain, the injured man was left at the farm of Mr. McLeod, while Mr. Innes came on in for a doctor. Mr. McLeod was the patient brought in to the public hospital here. Saturday morning the hand was operated on and dressed. The thumb and one finger will probably be saved.

—Dr. Archibald is making satisfactory progress at the general hospital.

—Messrs. J. B. Morris and J. B. Mercer returned from a trip to Wetaskiwin Saturday.

—J. W. Chartonau is about to start another watchmaking and jewelry store here.

—S. W. Anderson and H. E. Daniel came up from Fort Saskatchewan on Sunday. Travelling was very heavy.

—The Methodist church has bought property in Hprt Saskatchewan on Dennis avenue and a parsonage is now in course of erection.

—An epidemic of a mild form of typhoid fever is reported from Rabbit Hills. The school is closed, Mr. Durrand, the teacher, being among those affected.

—Timber cut within the C. P. railway belt in British Columbia, must be cut into lumber within the province. So says an order-in-council published in a recent issue of the Canada Gazette.

—Frank Armstrong brought in from the Landing Saturday a splendid sample of oats, grown and fully ripened in the garden of Colin Johnstone at the Landing. The oats are very plump and fully ripe.

—The local lodge of Woodmen of the World will give a concert in Hovell's Hall on Oct. 4th next. A programme of songs, recitations and character sketches will be provided, after which refreshments will be served and the evening concluded with a dance.

—Mr. Brunelle left last week for Great Falls, Mont., to bring back his brother, Albert Brunelle, who was dangerously ill with typhoid fever for seven weeks in the hospital here. His brother being yet too ill to travel for another two weeks, Mr. Brunelle was compelled to return. When convalescent Albert Brunelle will return to Edmonton.

—J. McDonald, of London, England, who is interested in mining operations on the river here, returned last week by boat from a trip up the river to Rocky Mountain House, examining the gold-bearing bars and benches of the river.

—G. J. Bryan, school inspector, returned on Friday from a tour of inspection of the schools in the country east of Wetaskiwin as far as Dried Meat lake. Harvesting was being pushed in all parts of the Wetaskiwin district and cutting was about completed. Stacking and fall plowing had begun in some places. Mr. Bryan is now making an inspection of the town schools.

—J. Obalski, mining engineer, and inspector of mines for the province of Quebec, arrived last week on his third visit to the district. This time Mr. Obalski came down the river by boat. He came up by train to Innisfail and thence took the Clearwater river route to Rocky Mountain House and followed the Saskatchewan down testing it for gold along the route. He was highly pleased with the result of the trip.

—J. R. Brenton rises to remark that the report of his statement before the town council regarding the quality of water supplied the town at present, which appeared in last issue of the Bulletin was incorrect. What he wishes to be understood as saying is that water when supplied through the filtering apparatus was impure. But as the water taken from the tank at present comes direct from the river without passing through the filter it is not open to that objection.

—W. J. Webster, of Westport, Ont., arrived Saturday. Mr. Webster is erecting a woolen mill here. He did not bring his machinery on this trip as it was necessary to arrange some place for the storing of it beforehand. He intends bringing it in this fall or winter and will endeavor to have part of his mill erected by that time so that the looms, which take up a great deal of space, may be stored until the mill opens for business in the spring. Though welcomed by a snow storm Mr. Webster is undismayed.

—The land slide mentioned in last issue of the Bulletin, by which a large portion of the hill face south of W. S. Edmonston's residence slid into the river, left Mr. Edmonston's residence in such a dangerous position, in the event of further slides, that the immediate removal of the house to another and safer portion of the lot was considered necessary. S. F. McCauley commences work this morning removing the structure. In the meantime Mr. and Mrs. Edmonston and family are residing at the Alberta.

—H. Sigler was awakened at a late hour Saturday night by the sound of some one moving around in his house. He arose and investigated and in one of the up-stairs rooms found a man, seemingly intoxicated, sound asleep on the floor. The door had been left unlocked and the intruder had taken advantage of it and made himself at home. A neighbor mounted guard over the sleeper while Mr. Sigler went for the police. Const. Deane was brought and took the man to the fire hall. He was Leon Martin, of Strathcona, and is now out on bail until three this afternoon when the comes up for trial.

J. T. BLOWEY.

Do Eyeglasses Injure?

Some people think glasses injure, because when once worn a person becomes dependent upon them. The truth is because a glass gives relief by removing the existing strain upon the eye, no time should be lost in affording this relief. Consultation free. Satisfaction guaranteed.

EDMONTON BULLETIN, SEPT. 23rd, 1901.

THE NEW PRESIDENT.

Theodore Roosevelt is the youngest president of the United States, having arrived at that high honor at the age of forty-three. Although of the same political party as his predecessor he is a very different personality; The feature of McKinley's public life was his conservatism. He stood for the betterment of existing conditions by the application of accustomed means. McKinley was a materialist, in the better sense of the word. Roosevelt is an idealist, a theorist. But a man of high ideals and noble theories, and without energy to an extreme degree. Roughly speaking McKinley was strong on protection, but weak on expansion, Roosevelt is strong on expansion, and is popularly supposed to be less in accord with the methods of the combines which stand for the visible results of protection than was McKinley. Giving both Roosevelt and McKinley credit for the best of motives there was an inter-dependence between McKinley and the combines that does not exist in the case of Roosevelt. He owes nothing to them in any part of his career. On the contrary it is commonly believed that he was forced on the republican party against their wishes by the wave of expansionist sentiment of which he was the accepted leader. The party found it necessary to choose him for vice-president in making expansion the issue of the campaign, and so keeping in the background the issue of the combines, which was the strength of the opposite party. Roosevelt is probably less of a party man than any of his predecessors. In other words his personality and his record have been his strength. Before the war with Spain he had become known as a champion of reform in the civil service, purity in politics and independence of the party machine. When the war broke out he resigned the position of assistant secretary of the navy, and raised a regiment with which he served with distinction in Cuba. As the direct result of this somewhat spectacular proceeding he became at once a popular idol, and had to be reckoned with for the presidency. What he may do when charged with the vast responsibilities of the presidency remains to be seen, but he enters upon his duties with a clean record in the public service and a reputation for pure patriotism which cannot be challenged. He represents the better elements in United States politics, and social life, and it is to be hoped, as it is to be expected, that his presidency will be to the advantage of the great country whose chief magistrate he is, and thereby to the civilized world.

DOWN IN A COAL MINE

The difficulties of mining coal, even in a locality where it is so generally plentiful as here, is shown by a walk through some of the mines whose tunnels run under the town with an opening on the hill face in front. Last week a member of the Bulletin staff had an opportunity of seeing how a mine is opened up and the coal removed. The labor which this involves is enormous. The mine being opened up is one of John Milner's, located in the eastern end of town on the property formerly worked by Bill Thomas. The coal is of excellent quality along this stretch, but is difficult of access. The new shaft which Mr. Milner is driving in is now 200 feet in the bank. Its object is to strike the coal level and the lower shafts and tunnels, and to do this much work is involved for which there is no corresponding revenue, for the shaft runs through and crosses the shaft and rooms of W. Thomas' mine, ground from which the coal has been largely removed before. For the first fifty feet in the shaft the light of day penetrates, then the glittering light of the little oil lamp, becomes very welcome for the floor is a mass of sticky, juicy, clay, caused by incessant drip from the roof and the footpaths on the two-by-four coal truck rails is a rather precarious one. The deeper in the mine the danger becomes, and daylight is long ago left behind, and the lamps cast just light enough to make the darkness visible. To keep a mine from caving it is necessary to crib it up on both top and sides as the tunnel progresses. Large posts are placed in along the supporting pillars of level apart and stringers placed across them on the top. Behind the posts and above these stringers shafts are placed forming a roof and sides. When 200 feet in the tunnel comes to an abrupt termination against a bank half clay and half coal. The lower part is clay and the upper half a solid ledge of coal. This, however, is only one of the supporting pillars of the former operator, Thomas, and is not the solid seam which the shaft is intended to strike. A walk down this shaft and a glance at the work involved gives an idea of the labor and expense of opening a mine. The coal when it is run out in trucks down a rough track and dumped on inclined sizers which separate the slack, or small cheap coal from the ordinary variety.

Electric mining machinery not being yet in use here, all the coal taken

out is mined with the primitive pick and shovel, the operator kneeling or crouching in a crouching position while he digs the dusky diamonds. When the truck is loaded another workman pushes it out to the dump. Every four feet in the tunnel has to be cribbed and roofed. If the householder who complains of the state of his coal bill would but take a walk down the gloomy cavern from which his fuel is mined, and see the places where the miners in perpetual night dig out the coal, he would never again think that \$2.50 per ton was a big price to pay for his fuel.

Though coal seams run under the town in many places, extending from the old Donald Ross mine east to Rat Creek, where the deposits run out, there is a possibility of a dearth of fuel within a very few years, or at least a difficulty in procuring it. So many mines have been opened and no plan ever put on record of their different shafts and rooms that to open a mine is now a much more difficult matter than it would have been had a system been observed. In years gone by the possibilities of saving in fire also more pronounced than they would otherwise have been, and the expense of opening and operating is more than doubled. So great is this difficulty becoming that legislation is being sought for requiring that a mine must be either experienced or else record a plan of his workings in any operations carried on hereafter.

A CABINET CRISIS.

An accidental explosion of fire works on board the public works department's yacht, at Quebec on Sept. 10th, on the occasion of the reception to the Duke and Duchess of Cornwall and York, endangered the lives of several cabinet ministers, and caused a number of serious injuries. The party included Mr. and Mrs. J. M. Green, shields, of Montreal; Mr. Clague and Miss Clague, Sault Ste. Marie; Hon. F. W. and Mrs. Borden, Hon. Jas. Sutherland, Hon. A. G. Blair, and Miss Blair, Hon. Clifford, and Mrs. Sifton, Hon. W. S. and Mrs. Fielding, Senator McKay, Senator Scott, Miss Scott, Mrs. Turcotte, of Ottawa; Mr. and Mrs. Clement, of Ottawa, and others. The injuries were Mrs. J. N. Green-shields, painfully burned; Hon. Mrs. Tarte, thrown down, face badly cut and right hand burned; Hon. Jas. Sutherland, hands badly burned; Mrs. Turcotte, slightly burned on arm; Mrs. Fielding's hair was burned, and also part of Mrs. Borden's dress. Hon. Mr. Borden sprained his ankle.

THE SASKATCHEWAN VALLEY.

Free Press: Mr. L. A. Hamilton and C. K. R. and commissioner Griffin have arrived in the city after a three-weeks' drive through 500 miles of what Mr. Hamilton says an American would call "the finest block of land that lies out of doors." This land comprises about 25,000,000 acres and was covered by the two C. P. R. officials from Waskiauk, through the Battleford east, north to the Vermilion lakes, across into the Blackfoot hills, then to the Saskatchewan river, from there south to the Trapping lake district, and east again to Saskatoon.

Said Mr. Hamilton: "What we saw confirms the view I have taken that there lies one of the richest tracts of land in the world. We found that settlers have pushed their way in and are located not only along the rail line, but 100 miles on each side of it. The soil in all parts we saw is of the richest and timber and water plentiful, except an eastern tract lying south of the Eagle Hills, where timber is scarce. In the Battleford district, lying 140 miles from the railway, we found excellent fields of grain being grown, but in the majority of the farthest districts cattle raising is the chief industry. Settlers are pushing their way out from Calgary and Edmonton as far as the Buck lakes, 100 miles from the railway."

"Game throughout this district was very plentiful, in fact, too plentiful. We were told that the prairie chickens had developed and they were dying off in thousands. This, I am told, occurs about every seven years, when the ravages of the disease is much more destructive than that wrought by the hunters after feathered game. There is no scarcity of fresh meats, however, and in many of the farming districts of ranching properties the owner has his own game preserve."

"On this tract of twenty-five millions of acres there is no reason why five hundred million bushels of wheat could not be raised and this will be the case some day not far distant."

AS TO ANNEXATION.

The Arcola, Assa, Star, commenting on a suggestion that Premier Roblin address a meeting at Indian Head on the subject of annexation of the eastern part of the Territories to Manitoba says:

"The people opposed to annexation need fear nothing from the outcome of such addresses as emanate from the brains of the supreme ruler of Manitoba. They may place full reliance in the common sense of the great majority of the people of the Territories, and rest assured that they will not allow themselves to be carried away by the benighted vapors of Manitoba's politicians, so long as their errors in governing their own little province will serve as hours revealing the dangers from hidden reefs that lie in the course they have followed. Guided by these errors, and profiting by their experiences the people of the Territories purpose building for themselves a province or provinces better suited to their views and purposes than any proposition Manitoba's premier can offer them."

ANARCHY IN FRANCE.

London, Sept. 18.—A special despatch from Paris says: "At Mont-lousa Les Mines, some hundreds of reservists, returning in uniform to France from the army manoeuvres, entered the town singing international and other revolutionary songs. A force of gendarmes attempted to disperse the reservists, but it was met by fixed bayonets, and charged the police, with cheers for anarchy and socialist equality. The gendarmes were scattered. The soldiers then held a mass meeting and passed a resolution in favor of a revolution."

CORNELLE-DAVISON.

Mail Empire, Sept. 5.—At noon yesterday, at the residence of Mr. and Mrs. R. T. Williams, Miss Dorcas Davison, daughter of the late M. Davidson, M. D. of Florence, Ont., and niece of Mr. J. L. Davison, of this city, was married to Rev. G. C. Cornelle, B. A., B. D., pastor of the Methodist church of Maidstone, Ont. The bride wore her travelling gown of blue ladies' cloth, which was tastefully trimmed with white tulle and silk cord, and buttons. Her hat was of grey felt, trimmed with grey velvet, and grey wings. The maid of honor was Miss Vivian Brown, of Exeter. Rev. C. W. Brown, B. A., B. D., cousin of the bride, performed the ceremony. Mr. Cornelle is a graduate in arts and divinity of Victoria University, and Miss Davison is an undergraduate of the same university.

HUDSON'S BAY COMPANY

INCORPORATED A.D. 1670

Ladies' Jackets.

Some beauties. We are told that ours are much the most stylish goods in town. From \$5 to \$20.

A few Jackets carried from last year at from \$1 to \$4.

EDMONTON BULLETIN, SEPT. 23rd, 1901.

THE DEAD PRESIDENT.

The death of McKinley is a uni-

versal grief. When a man

of high position dies it is only natural

that grief should be felt on the loss of a

leader. In stating the events

of his life, as therefore laid

out, which have caused the feelings

of regret with which his death is

met, especially in such a case

as that of the recently murdered presi-

dent, it is to be feared that

it will be in the general inter-

est of the whole country, his attitude

was strictly conservative. His influ-

ence was always against special ad-

vantages to special classes, and against

using the tariff for the purpose of in-

ducing one or another foreign coun-

try. Although for many years he

was in the midst of a stream of mil-

lions poured out from time to time in

the interests of the party of which he

was the head, there is no whisper that

a single dollar improperly earned ever

found its way into his pocket. At the

same time, although he must have

seen, it was impossible for him to

check, the evils which are now ac-

knowledged to have had their founda-

tion in the very policy of protection

which he looked upon as the salvation

of the nation. It is to be feared that

as a true patriot he lived long enough

to feel himself in much the same posi-

tion as Elmhurst the Sailor with the Old

Man of the Sea on his back. He had

taken up the policy of protection from

the best of motives, but once the pro-

tected industries were safely installed

on his shoulders he ceased to be a free

agent, and indeed may have been com-

pelled by threats of political destruc-

tion to accept conditions of which he

did not approve.

While McKinley owed his attain-

ment of the presidency to his advoca-

cy of protection, he owed his reten-

tion of the position to the enthusiasm

of the people for the policy of expan-

sion which took its rise in the war

with Spain. And yet he was not an

advocate of the war. He was the first

to call for peace. On the contrary because

of his disinclination to declare war he

was attacked virulently by the same

papers which now denounce the policy

of expansion—the necessary and pro-

per result of the war. His atti-

tude at the commencement of and

during the war was first of careful

hesitation and then of firmness.

While earnestly desiring peace he was

prepared to take the responsibilities of

war, which has been carried on suc-

cessfully and to the very great credit

of the soldiers, the nation and the

president. The horrors of war are al-

ways to be avoided, if possible, but

if they must be faced let them be fac-

ed calmly and determinedly as they

have been by the United States un-

der the administration of the late

president. It was fortunate for the

United States and for the rest of the

world that war came during the ad-

ministration of a president always

willing to avoid it, always anxious to

prevent the extension of its horrors

and yet always ready to face it for

the honor and safety and material ad-

vantage of his country.

A STRANGE SEASON.

Summer is over and fall has begun.

It has been a strange season all over

North America. A season of sudden

changes and great extremes. The fea-

ture of the season was the great heat

and drought prevailing south of the 49th

parallel and east of the Rockies. While

excessive heat was general during July

throughout that region the Middle

Western States were the great seat

of the drought. A season of sudden

changes and great extremes. The fea-

ture of the season was the great heat

and drought prevailing south of the 49th

parallel and east of the Rockies. While

parallel and east of the Rockies. While

NORTH-WEST PUBLIC WORKS.

From J. S. Dennis, deputy commissioner of public works, for the Territories, the Bulletin has gathered the following information regarding the more important road improvement works being carried on by the local government in the three local electoral districts of Edmonton, St. Albert and Victoria.

The Morinville ditch, is ten miles in length and will actually drain or give drainage to the swamp lying between the St. Albert settlement and Morinville. Starting from the vicinity of Morinville post office on the north line of township 55, range 25, it follows the road allowance along the west side of sections 34, 27, 22, 19, 10, and 3 in that township to its south line. In township 54 it follows the west side of sections 33, 28 and the north half of 21. At this point the ditch is three and a half miles north of St. Albert bridge. From the centre of 21 it turns southwesterly across sections 20 and 18 of the same township emptying into Carrot Creek at the township line. For eight miles and a half the ditch follows the road allowance, except for a few minor deviations. Work is finished from the outlet into Carrot Creek to within a mile and a half of Morinville. The results of the ditch are already apparent, as the swamps have been drained all along the line of the ditch, and an opportunity is afforded to drain them on either side into it as well. The government having supplied the district with a trunk line of drainage it is expected that the statute labor districts adjoining will cut the necessary tributary ditches. This applies to the drainage of the road allowance from the point at which the ditch leaves it to the rear of St. Albert settlement, about two miles.

The first object of the ditch was not so much to drain the swamps as to secure a good road from Morinville to the settlement and the country behind it to St. Albert. This could only be done by the construction of the ditch. The earth taken out is placed on the road way and will be smoothed down with the road grader. The deepest cut is six feet. Sam Davidson, of St. Albert, is the contractor. The work will be completed this fall, at a cost of about \$800.

Probably the next largest work in hand is the improvement of the road to Stony Plain, on the 14th base line, through the tamarac swamp extending about four miles from Goodridge's Creek, west of town, to the edge of the Plain. A great deal of work has been done on this piece of road during the past three years, the greater part having been corduroyed. It is expected that it will be permanently improved throughout before frost sets in this fall. Here too the main feature of the work is a ditch which parallels the road from the edge of the Plain to Goodridge's Creek. Although not yet completed this ditch has drained the pond at the Beaver Hills in the past and when completed will drain the water all the way across. The deepest cut is five feet. The road will be done by the day under a competent foreman.

There will also be about 1,000 feet of corduroy put in in the swamps and the whole of the corduroy will be covered with ten inches of clay. Mr. Scott has the contract of the corduroy and clay covering.

East of Fort Saskatchewan a ditch six miles in length is being dug to ensure a dry roadway from the Port to the base of the Beaver Hills in the Josephine settlement. The ditch is along the road allowance north of township 54 from the head of the ditch to the centre of section 2, township 55. It there turns northwesterly through sections 2, 3 and 4 of the same township and enters Rose Creek in river lot 5. Fort Saskatchewan settlement. There is heavy work on this ditch, some of the cuts being 10 feet deep. The original contractor failed to complete the work and the contract was re-let to the Hon. Ryan, who is pushing the work and will have it completed this fall. This ditch will drain a very large swamp lying along the foot of the Beaver Hills besides a number of smaller swamps along its route, and will ensure a dry road from the large settlements in the hills to Fort Saskatchewan.

Among the many minor works being carried on at present are the improvement of the Clover Bar trail from the south end of the bridge across the M^o Creek to the back of Dowler's place. There is very heavy travel on this piece of road and it has been placed in excellent shape. The hill has been graded and the grade reduced. The road across the flat has been graded up all the way.

During the summer preliminary surveys have been made with a view to further road improvements and drainage in the near future. A survey has been made of the road from north of town to the Sturgeon and the country along with a view to draining Favella's lake which lies directly across the road into the Sturgeon River. Another survey has been made along the St. Albert trail looking to the drainage of Horse and Long lakes into the St. Albert as well as a dry road to St. Albert. Surveys have also been made east of St. Albert looking to the drying of the road two miles south of the 14th base line eastward to the Beaver Hills. Besides these, surveys have been made for a number of smaller ditches at other points to drain individual ponds, and for a large number of divisions of road allowance around impassable places.

The public works department has also either completed this season or is in progress nine bridges in the three local districts mentioned. These are all being erected by day labor under the supervision of a competent builder, the local government having adopted this as the system most certain to ensure efficiency and economy. The bridges are on the following streams and trails:

Rat Creek, north of town, on road allowance between river lots 18 and 20.
Horse Hill's Creek, on Fort Saskatchewan trail.
Sturgeon river near New Lunnion post office.
White Mud Creek, Rabbit Hill trail.
Stony Creek, Sandy lake trail.
Old Man's Creek, Clover Bar trail.
Rose Creek, Victoria trail at Fort Saskatchewan.
Rose Creek, Beaver lake trail, near lake.
Beaver Creek at outlet of lake.

In the whole of the Territories the government have 13 bridge gangs at work, and this season will build 10 new bridges of which 10 will be steel.

Two steel bridges are being placed across the Battle river, one east of Wetaskiwin and the other six miles west of Ponoka. A steel bridge was erected at Ponoka last year. A steel bridge is being erected across the Blindman river on the Calgary trail, to be completed this fall, and the Red Deer bridge will be replaced this fall. Although the many streams which form the north and south branches of the Saskatchewan head in the Rockies and flow across Alberta, every important stream on the great main trail from Edmonton through Calgary and Macleod to the boundary is now bridged or will be this fall. So that a traveler can drive the 300 miles from Edmonton without fording a single stream. The streams are: Black Mud, Pipestone, Big Stone, Wolf Creek, Battle river, Blindman, Red Deer river, Nose Creek, Bow river, Fish Creek, Sheep Creek, Tongue Creek, High river, Mosquito Creek, Willow Creek, Old man river, Kootenay river, Belly river, St. Mary's river. Of these bridges those across the Saskatchewan, Bow and Old Man's were built by the Dominion. The others have all been, or are being, built by the Northwest government.

Spiking of the loss of two spans of the Red Deer bridge by the high water of last spring, Mr. Dennis said the bridge in the year '99, the government erected 67 bridges, and in 1900 137. Two hundred and four bridges in the two years. Of these three had gone out. One across the Jumping Pond, one across Willow Creek and the Red Deer. However, the experience gained will enable the department to re-build the Red Deer bridge so that it will not go out. It will be completed during the winter.

The total expenditure for the year under control of the local department for public works will be about \$350,000. This includes the cash received from large and small local improvement districts and does not include the labor done in commutation of local improvement taxes. Of this large amount all but ten per cent is expended on the actual works. This percentage pays office and engineering staff.

THE ROYAL VISIT.

Calgary Herald: Major Howe, officer in command of the Northwest mounted police at Macleod, will arrive in the city to-morrow night with a contingent of officers and men, and will remain here until after the departure of the Duke of York.

Rev. C. E. Sumner returned north to Red Deer this morning. While in the city Mr. Sumner made arrangements with Mr. Winn to quarantize a number of the pupils of the industrial school in the immigration hall during the royal visit.

Rev. Father's opinion, who is at present acting principal of the Dunbow industrial school, was in the city yesterday making arrangements for the pupils of the school to be on the occasion of the royal visit. Rev. Father Naessens, the former principal, is now acting principal of a missionary school in Belgium and will not return to the Northwest. It is therefore altogether likely that Father Leprieux will be appointed permanent principal.

SPRUCE GROVE.

Farmers are very busy cutting, as late frosts have prevented the grain. The many friends of Mr. Geo. Sutherland will be sorry to learn that he is confined to his bed.

Mr. Widdenhauer has his house about completed.
Mr. Schumann is building a house.
Our blacksmith is kept very busy.
Mr. Empey, teacher at Stony Plain, was greatly surprised to find on his desk on Tuesday, 17th, a beautiful bouquet of ripe strawberries that had been picked that morning by one of his pupils, Michael Treil.

PRINCE ALBERT.

Advocate, Sept. 9.
A heavy rain and wind storm, lasting all day on Thursday, put a stop to harvesting operations for a few days. With the bright, clear weather now prevailing, work is in full swing again.

T. O. Davis has sold out his general store business to a company of local capitalists, who are continuing the business under the firm name of the Prince Albert Trading Co., with Mr. F. H. Clinch as manager.

INISFAIL.

Free Lance, Sept. 13.
Rev. Mr. Atkinson and family will be leaving for Ontario in a week or two.

The Rev. Robert Connell has resigned the incumbency of St. Mark's, Inisfail. The reverend gentleman has accepted a call to the Anglican church at Ladysmith, Vancouver Island.

The Inisfail agricultural society's fall show is advertised for Thursday, September 25.

PONOKA.

Herald, Sept. 13.
Township 40 and 41 in range 2 west 5th meridian is now open to entry.

A. Mr. Bates arrived from Calgary yesterday with three cars of cattle and effects.

John Cameron, forest ranger and fire guardian, was inspecting a good timber land southwest of here last week.

Geo. D. Clark, arrived from Calgary, N. D., this week with his family and another car of stock and settlers effects.

The Royal Hotel is now under the control of a new landlord. W. J. Dea, of Inisfail, who assumed the management last Saturday. Security of line has somewhat delayed the work of the manager.

The foundation is being laid for the new village school house.

E. E. Robertson was a business visitor to Edmonton the first of the week.

Mrs. George Sellars was at Edmonton this week where she purchased the furniture for the Hotel Ladysmith which will be opened within a short time.

A. L. Fairfield will embark in the general merchandise business at Morningside. He will have goods in about three weeks. Mr. Fairfield has a good position and we wish him every success in his new location.

D. Porter, who recently came here from Sutton, Que., is impaired health. He is in town a couple of days this week. He shows a wonderful physical improvement and has about decided to locate here, which we hope he will do.

CANADIANS MENTIONED.

Ottawa, Sept. 12.—Dr. Borden, minister of militia, has received a cable from Lord Strathcona announcing that Lord Roberts has mentioned in a despatch for distinguished service the following:

Major Williams, now in Ottawa, of the R. C. D.; Major Cartwright, Major Forrester; Major Sanders, Northwest Mounted Police; Capt. Stairs, of Halifax; Lieut. Borden (deceased), son of Hon. Dr. Borden; Lieut. Morrison, of Ottawa; Lieut. Mason, of Toronto.

Some of the above have been promoted in rank since the war.

NEW B. C. COAL FIELDS.

Grand Forks, B. C., Sept. 14.—During the week ending to-day the Granby smelter treated 4,648 tons of ore. The total treated to date is 217,734 tons.

The Granby smelter has taken a working bond on the recently discovered famous coal fields on the west of the north fork of the Selkirk river, 63 miles north of this city. The option applies to fifteen locations, comprising 10,000 acres in the two years.

A party of men will be despatched from here to-morrow for the purpose of beginning development work. A trail will also be extended to the coal fields from a point where the wagon road ends. The bond covers a period of twelve months. Analysis of the coal shows it to contain over 70 per cent of fixed carbon and equally as good as the C. O. No. 2 coal for coking and domestic purposes.

Free Press: It is announced that the old Fort Arthur, Duluth & Western, now part of the Canadian Northern system is being thoroughly repaired from Stanley Falls to Gunflint. New ties are being put in and the thick growth of brush and bushes out from the right-of-way, where it grows in some few years for a distance of seven miles. This is a strong indication that the Mackenzie & Mann interests propose to make that branch an important factor in their system.

Working Day and Night.

The busiest and nightliest little thing that ever was made is Dr. King's New Life Pills. These pills change weakness into strength, listlessness into energy, brain-fog into mental power. They're wonderful in building up the body by burrowing or their daily authorized agents.

D. W. Macdonald, druggist.

Twelve Million in Force.

The Great West Life Assurance Company has, from its inception, pursued a most conservative course with regard to its investments. It has reserved the most important of fully safe-guarding the interests of its policy-holders and the security of its funds. This is evidenced by the fact that the Canadian Government has since Jan. 1, 1900, required from all companies a higher standard of Reserve, thus endorsing the sound policy of the Great West Life.

In addition to creating an ample Reserve, there are two other factors of vital importance to the policy-holders, namely, the size and the remunerative investment of the funds. That this company can print to the fact that it does not have a dollar's worth of property under forced-closed mortgages, is sufficient testimony of the manner in which its investments have been made. While thus successfully handling its funds, it has been able to earn a higher rate of interest than any other company, justifying its claim to be the best company for its policy-holders and proving the truth of its recommendation of its funds.

The great western country of Canada is acknowledged by all to be the most favorable field for the investment of money provided the investor is experienced and possesses a thorough knowledge of the country. The Great West Life is fortunate in having on its Board of Directors many of the leading, and most experienced and successful investors of capital in the West.

The fact that the Great West Life Assurance Co. earns two per cent. more interest on its funds than any other company doing business in Canada explains why it can, at the same time, charge a lower premium and return to its policy-holders a greater dividend than any of its competitors.

IMPRESSIONS OF EDMONTON.

W. M. Fisher, Winnipeg manager of the Canadian Permanent, who recently visited Edmonton in the interests of that company has been interviewed by the Free Press. He said:

I first visited the Edmonton district some seven or eight years ago and looked upon it then as a most promising section of the country. My second visit was not made until the second year of this year, and my third visit in August. I spent in all last year in the district. I spent nearly two months in the district. I remarked a very great change about the city of the Calgary and Edmonton railroad from its initial up to Edmonton. In the country contiguous to it, and in the country of which I drove, making over much of the country. The country is filling up with a most excellent class of settlers, Canadian, Swede, German, Galician and American, many of the last being repatriated Canadians.

The Galicians, against whom I was prejudiced before by visit, and of whom there are about ten thousand in their town as well as in the country, are doing a splendid work, being hard working, frugal people, and in their financial dealings honest to a degree.

Edmonton is a very live town, and its business men are quite up to the times and possess a most excellent knowledge of their town as well as of the Canadian Northern railroad in its operations. The Canadian Northern is bound to take place. The town has all the natural advantages necessary for the making of a large city. Its inhabitants have sufficient enterprise to take advantage of every opportunity. The Canadian Northern railroad is now making connections with Strathcona on the opposite side of the Saskatchewan river and railway communication will be established in the course of a few weeks, which will be a great boon. This railroad, in addition, when completed, will open up thousands of square miles of land which there is no doubt better to be found in the country than in the city. It will pay tribute to Edmonton.

"How does Northern Alberta compare with our province of Manitoba?" "Very favorably. The land is somewhat lighter and warmer and more rolling. It has great strength, as past and present crops abundantly testify. Manitoba is a great province, as we know, but I must admit it is not, to use a slang expression, 'the only red on the beach.' I am inclined to think there is almost as much ignorance in Manitoba regarding Alberta as exists in Ontario regarding Manitoba, and this is saying a great deal. There is no cause for jealousy, however, for all portions of the Northwest have common interests."

"We notice your corporation has established a branch office in Edmonton. Have you any objection to state your reasons for so doing?"

"Now whatever. Simply to meet the demand for money and to accord credit in Northern Alberta better facilities than we were able to offer from Winnipeg. We feel confident that the business of Alberta is beyond the experimental stage and upon a sound basis, and where we are assured such results exist, it is the policy of the corporation to assist in the development of the west."

ROBE HILLS.

The hum of the threshing machine is again heard throughout the land, and the "foot" of the steam whistle calls the weary farmer and threshing crew from their peaceful slumbers to prepare for the next day's hard work. Threshing crews are made up of men with plenty of brawn and muscle. It is also indispensable that each should be possessed of a large digestive apparatus capable of storing a large supply of food for long periods. Their stomachs should be made up of the very best material available so as to be able to digest everything that is put into them. Threshers should also be the very best, capable of working in all kinds of weather, and able to contain large quantities of food and be able to sleep in the straw stacks, stable, pig pen, or even out doors. Threshers long for sweet Saturday night to this time of year. It is necessary to swallow large quantities of stimulants to make the gastric juice assimilate with the many different kinds of food which are served out to them. Taking them all round they handle the foot, who are often very busy, and many fine men, and all will go well. But you find and you will be sorry. Angels have been entertained unawares.

Fine harvest weather prevailed until the last of the week. The plains were covered with hay stacks and grain crops. Some think it will be necessary to lay adjoining sections of vacant land so as to have room for stacking purposes.

Rosettes, Galicians, and every other kind of human being are in demand at present. And this sort of harvest would be a bad fix for the harvest hands only for the late subjects of the Czar.

Everything is quiet on the hills at present. Every able bodied man is busy at work bringing in the sheaves. So far finds no mischief for idle hands to do.

Sept. 21, 1901.

STRATHONA.

Plunderer, Sept. 20.
R. A. Hulbert is erecting a fine residence on his property near the corner of Granada St. and McDonald Ave. It is a two-story frame with stone and brick basement and cottage roof.

Teacher Fulton is having the old library stable removed from his property. Mr. W. E. Ross, hardware preparatory to the erection of a new building there next spring. That will be an improvement to the town which will meet with popular favor. The stable will be placed on Main St. near the Klondike stable.

Miss Eva Watson, of Strathcona, has been appointed teacher of the Hamilton public school district out from Wetaskiwin. She will assume her duties on Monday next.

The Northern Elevator Co's elevator here is receiving a long needed coat of metallic siding.

Strathcona's new electric light plant has not yet arrived but is expected any time now and will be installed as soon as possible.

J. C. Wainwright, undertaker, has purchased to N. D. Mills for benefit of creditors.

HOTEL ARRIVALS.

Friday.

Victoria-T. A. Lavoie, city; Corp. Phillips and wife, Fort Saskatchewan; M. Gervais, town.

Queen's-W. Byrnes, Peterboro, Pa.; Mrs. Long, Chas. F. Stewart, G. H. McAvoy, Fort Saskatchewan; J. Burns, Didsbury; S. A. Bentley, Stony Rapids; Geo. Reid and family, Aberdeen, South Dakota; A. Gowat, Sturgeon; W. A. Hadue, Canistota; S. D. G. L. Menegar, Calgary; J. W. Charbonneau, R. A. Clifford, Arnprior.

BAD WEATHER IN MANITOBA.

Free Press, Sept. 18.—Upon inquiry amongst the grain trade yesterday, it was learned that the shipping has practically ceased in several sections of the province and the Territories. Rain has fallen in many places, particularly in the northwestern district, and as a result, threshing from the stock has stopped altogether in those parts. Some little threshing may be doing where the grain is stacked, but it has fallen off to such an extent that deliveries are now very light. As a result it is expected that wheat will have an upward tendency during the next few days owing to the shortage of early deliveries. Until the present damp weather ceases this state of affairs will continue. Last night's rain if general throughout the province will have the effect of materially retarding the threshing operations for some days to come.

BATTLEFORD.

Herald, Sept. 17.
The week has been marked by heavy rains and thunder storms. A settler from Nebraska has bought out of Bellevue's place at the middle mail station and all his equipment, and also all head of cattle and will take possession in the spring.

Measles has broken out in Jos. Noll's family, on the north side of the Saskatchewan, five miles from town. Benj. Davis, Dominion immigration agent for Minnesota, has been showing a delegation of American capitalists through the northern part of Assiniboia. They purchased seven townships at Kraik, on the line of the Prince Albert road. They have selected a township, where a new town will shortly be established. The delegation, consisting of themselves, as delighted with the country. (This is part of the land which the Long Lake & Saskatchewan Railway Co. say is unfit for settlement.)

Another delegation in charge of T. O. Davis, M. P. for Saskatchewan, are negotiating for the purchase of portions of an Indian reserve that is to be opened for settlement.

A COASTY PET.

Maifeking, Cape Colony, Sept. 12.—The British casualties in the Great Marais Valley, Sept. 6 and 8, when General Methuen was engaged with Vanderlin and Delany driving the Boers from a strong position there were 25 killed and 36 wounded, including Capt. Croft.

A Night of Terror.

"awful anxiety was felt for the widow of the late General Burnham of Michigan, Mo., when the doctors said she would die from pneumonia before morning" writes Mrs. S. H. Lincoln, but she begged for Dr. King's New Discovery, which had more than once saved her life, and "dread her of Consumption." After taking the first night's trial, she was entirely cured. This marvelous medicine is guaranteed to cure all Throat, Chest and Lung Diseases. Only 50c and \$1.00. Trial bottles free at Macdonald's drug store.

A Salesman's Story

"Yes sir," this is Stanfield's Unshrinkable underwear, pure wool and guaranteed not to shrink. There are other goods marked "I'm shrinkable," "Warranted not to shrink," etc., but they are mostly of foreign make and are either part cotton or do shrink.

"Stanfield's" however, are made entirely from the best Nova Scotia wool by the Truro Knitting Mills Co., the largest manufacturer of high-class knit underwear in Canada. They guarantee them to you; we in turn guarantee them to you in the only way that is worth considering. "Get the size that fits you and they will wear any other goods on the market and always be comfortable. No more expensive than any other underwear of equal quality."

is sold by Dry Goods and Gent's Furnishing Stores. Ask your dealer for them.
